

# Pupil Development Grant School Statement: The Maelor School

This statement details our school's use of the PDG for the 2024 to 2025 academic year.

It outlines our strategy, how we intend to spend the funding in this academic year and the effect that last year's spending had within our school.

# School Overview

| Detail   | Data                   |
|--|------------------------|
| School name  | The Maelor School      |
| Number of learners in school                       | 671 (y7-11)            |
| Number and proportion (%) of PDG eligible learners | 69 pupils / 10.28%     |
| Date this statement was published                  | November 2024          |
| Date on which it will be reviewed                  | November 2025          |
| Statement authorised by                            | Leanne Eyre            |
| PDG Lead   | Leanne Eyre/Lisa Steen |
| Governor Lead                                      | Cora Suckley           |

# Funding Overview

| Detail                                    | Amount     |
|---|------------|
| PDG funding allocation this academic year | £81,650    |
| Total budget for this academic year       | £4,748,297 |
|   |            |

## Part A: Strategy Plan

#### Statement of intent

#### Supporting all pupils to 'Realise their Potential'

Our intention is that all pupils, irrespective of their background or the challenges they face, make good progress and achieve well across the curriculum. The focus of our PDG strategy is to support disadvantaged pupils to achieve that goal, and ensure that they leave The Maelor School having 'Realise[d] their Potential'.

We will consider the challenges faced by vulnerable pupils, such as those who have a social worker and young carers. The activity we have outlined in this statement is also intended to support their needs, regardless of whether they are disadvantaged or not.

#### Excellence in teaching

Ensuring high-quality teaching is at the heart of our approach. By embracing research undertaken by the Education Endowment Foundation (EEF), we know that ensuring excellence in teaching is proven to have the greatest impact on closing the disadvantage attainment gap. At the same time, this will benefit all pupils in our school.

#### Knowing our pupils and their needs

Our approach will be responsive to common challenges and individual needs, rooted in robust diagnostic assessment. eFSM students will not be treated as one homogenous group assumptions about the impact of disadvantage will not be made. There will be a focus on high expectations, appropriate levels of challenge and interventions that are focused around detailed knowledge of each student.

## Challenges

This section details the key challenges to achievement that we have identified among our students who are eligible for free school meals.

| Challenge<br>number | Detail of challenge  |
|---------------------|--|
| 1                   | CATS assessments on entry to Year 7 in 2024 indicate that many of our eFSM pupils have a lower mean CATS score than their peers.   |
| 2                   | Assessments of lower school students indicate that students eligible for free<br>school meals generally have lower literacy than their peers. This impacts their<br>progress in all subjects.  |
| 4                   | Our assessments, observations and discussions with students and families<br>suggest that the education of many of our students who are eligible for free<br>school meals continue to be affected by the impact of the partial school<br>closures during the COVID-19 pandemic, and to a greater extent than for other<br>students. These findings are supported by national studies. |
| 5                   | Our observations suggest many lower attaining students who are eligible for<br>free school meals lack metacognitive / self-regulation strategies when faced<br>with challenging tasks, notably in their monitoring and evaluation of their<br>answers.   |
| 6                   | Our assessments, observations and discussions with students and families have<br>identified social and emotional issues for many students, such as anxiety and<br>low self-esteem. This is partly driven by concern about catching up lost<br>learning and exams/future prospects. These challenges particularly affect<br>disadvantaged students.                                   |
|                     | School exclusion data shows that students who are eligible for free schools are higher than other students.  |
| 7                   | Our attendance data indicates that attendance among students who are<br>eligible free school meals is lower than their peers. A greater proportion of<br>students eligible for free school meals have been 'persistently absent'. This<br>reflects the national picture.   |

# Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

# Activity in this academic year

| Intended outcome  | Success criteria  |
|---|---|
| Excellent attainment<br>and progress among<br>students who are eligible<br>for free school meals<br>across the curriculum at<br>the end of KS4. | 2024/25 KS4 outcomes demonstrate that eFSM students make strong progress in their qualifications, given their starting points.  |
| Improved literacy skills<br>among students who are<br>eligible for free school<br>meals across lower<br>school (years 7-9).                     | Personalised Assessments in Reading and STAR Reader data<br>demonstrates an improvement in skills among eFSM students. This<br>improvement will also be evident through engagement in lessons<br>and work scrutiny.   |
| Improved metacognitive<br>and self-regulatory skills<br>among eFSM students<br>across all subjects.   | Teacher reports and class observations suggest students who are<br>eligible for free school meals are more able to monitor and<br>regulate their own learning. This finding is supported by student<br>progress data and scrutiny of eFSM students' work.   |
| To achieve and sustain<br>improved wellbeing for<br>all students, including<br>those who are eligible<br>for free school meals.                 | <ul> <li>Sustained high levels of wellbeing by 2024/25 demonstrated by:</li> <li>qualitative data from student voice, student and parent surveys and teacher observations;</li> <li>quantitative data from PASS survey;</li> <li>a significant increase in participation in enrichment activities, particularly among eFSM students.</li> </ul> |
| To achieve and sustain<br>improved attendance for<br>all students, particularly<br>our students who are<br>eligible for free school<br>meals.   | <ul> <li>Sustained high attendance for 2024/25 demonstrated by:</li> <li>the attendance gap between eFSM students and their non-<br/>disadvantaged peers being reduced.</li> <li>the percentage of eFSM students who are persistently absent<br/>reduces significantly</li> </ul>   |

This details how we intend to spend our PDG **this academic year** to achieve the intended outcomes listed above.

# Teaching and Learning

# Budgeted cost: £41,614.44

| Activity   | Evidence that supports this approach<br>(links to EEF Toolkit and other<br>relevant research)   | Challenge<br>number(s)<br>addressed |
|--|---|-------------------------------------|
| Purchase of standardised diagnostic<br>assessments.<br>Training will be provided for staff to<br>ensure assessments are interpreted<br>correctly.  | Standardised tests can provide reliable<br>insights into the specific strengths and<br>weaknesses of each student to help<br>ensure they receive the correct<br>additional support through interventions<br>or teacher instruction.   | 1, 2, 3,4                           |
| Developing metacognitive and self-<br>regulation skills in all students.<br>Ensure that students receive<br>effective diagnostic feedback that<br>moves learning forwards.<br>This will involve ongoing teacher<br>training and support and release<br>time. | Teaching <u>metacognitive strategies</u> to<br>students can be an inexpensive method<br>to help students become more<br>independent learners. Likewise, teacher<br><u>feedback</u> aids students in understanding<br>their next steps, and how to progress.   | 1, 5                                |
| Further investment in CPD for middle<br>leaders in relation to design of<br>Curriculum for Wales. This will<br>involve understanding the research<br>behind curriculum design, and<br>collaboration with and across<br>schools.                              | Students <u>need to be able to develop</u><br><u>schemata</u> in order to make links across<br>curriculum areas. In order for learning<br>to be transferred into students' long<br>term memories, it needs to be built<br>upon prior learning and grounded in the<br>context of what students already know.<br>Therefore, an effectively sequenced<br>curriculum will help students to learn<br>more effectively. | 1,5                                 |
| Improving literacy in all subject<br>areas. We will fund professional<br>development focussed on each<br>teacher's subject area  | Acquiring <u>disciplinary literacy</u> is key for<br>students as they learn new, more<br>complex concepts in each subject.  | 1, 3                                |
| Small group intervention for reading   | Tuition targeted at specific needs and<br>knowledge gaps can be an effective<br>method to support low attaining pupils<br>or those falling behind.  | 1, 2, 3                             |

Community Focused Schools (to include: (i) building strong partnerships with families; (ii) responding to the needs of the community; (iii) collaborating with other services)

#### Budgeted cost: £13,500

| Activity   | Evidence that supports this approach  | Challenge<br>number(s)<br>addressed |
|--|---|-------------------------------------|
| Implement a range of<br>alternative provisions and<br>curriculum pathways. | Bespoke provisions supported by <u>support</u><br><u>staff</u> ensure that students receive a<br>curriculum that meets their needs, and<br>maintains engagement in school life. | 1, 2, 6, 7                          |
|  | Some provisions focus on helping students to more effectively regulate their choices and behaviour.   |                                     |

# Wider strategies (for example and where applicable, Health and Well-being, Curriculum and Qualifications, Leadership and Raising Aspirations)

#### Budgeted cost: £26,535.56

| Activity   | Evidence that supports this approach  | Challenge<br>number(s)<br>addressed |
|--|---|-------------------------------------|
| Well-being curriculum during<br>PG Days and Form Tutor time  | EIF's report on adolescent mental health<br>found good evidence that CBT interventions<br>support young people's social and emotional<br>skills and can reduce symptoms of anxiety<br>and depression. | 5                                   |
| Implement Attendance Policy.   | https://educationendowmentfoundation.org.<br>uk/education-evidence/evidence-<br>reviews/attendance-interventions-rapid-<br>evidence-assessment  | 7                                   |
| Uniform and resources  | Some funding is used purchase items for identified students.  | All                                 |
| Tools to ensure effective<br>communications within<br>school, and from school to<br>families (Bromcom<br>implementation) | Research shows that <u>parental engagement</u><br>can have a significant impact on students'<br>learning.   | All                                 |

Total budgeted cost: £81,650
